

## Protect Your Investment

### Comprehensive Coverage Plans for Your Data Acquisition System

Everyone carries insurance coverage on things that are important to them. With ESC|DASProtect, you can do the same for your CEMS Data Acquisition System (DAS). ESC offers comprehensive plans designed to protect you from unforeseen increases in your compliance costs resulting from incremental charges for technical support, software and firmware updates, hardware maintenance and related software applications. With varying levels of coverage, DASProtect allows you to choose a plan that best accommodates your needs and budget!

As the industry evolves over the next few years, you will be expected to address changes in regulations and technology. Greenhouse Gas policies are evolving, and the signed Mandatory Reporting Rule is just the beginning. Although a Cap-and-Trade Program hasn't been established and restrictions haven't been imposed, more stringent legislation is on its way. The emergence of increasingly challenging state and local permitting requirements cannot be ignored. Additionally, increasing IT maintenance requirements for stack compliance monitoring systems are being met with the industry-wide downsizing of IT staffs. On top of all of this, the poor global economy has left many companies with tighter budgets, eliminating funds used for unexpected costs. Now is the time to evaluate your DASProtect agreement and ensure that it provides you with the level of coverage needed to successfully address these changes!

### Give your company the peace of mind that comes with ESC|DASProtect!

#### Predictable Cost Curve

Protect yourself against unforeseen increases in your compliance costs.

#### Plan Options

Select the coverage option that best fits your needs.

#### Investment Protection

Keep your DAS and your team's skills up-to-date with changing regulations and technology.

#### Cost Savings

Obtain substantial cost savings by purchasing all of the services that you typically need in a single agreement as opposed to purchasing them individually.

## Levels of Support and Coverage

ESC|DASProtect allows you to choose a level of coverage that best meets your needs. No matter what level of protection you choose, you can count on support and assistance from ESC!
