

# ESC | SAFEPASSAGE Program™

Transitioning to PADEP Revision 8

The ESC|SafePassage Program offers turnkey solutions to your ever-changing needs as regulations and the industry are constantly evolving. ESC was here to help with your XML conversion through the ESC|SafePassage Program – A Smooth Transition to XML and prepare you for the future with ESC|SafePassage Program – Understanding Data Management. The latest SafePassage Program, ESC|SafePassage Program – Transitioning to PADEP Revision 8, is a program designed specifically for PADEP sources that will be transitioning to Revision 8 in 2009.

SafePassage Program – Transitioning to PADEP Revision 8, prepares Pennsylvania facilities to meet the new Continuous Source Monitoring Manual (CSMM) Revision 8 monitoring and reporting requirements. Revision 8 introduces new data validity requirements, new QA test procedures and error calculations, as well as a new reporting format. ESC recognizes that change can be overwhelming and time consuming. With the SafePassage Program – Transitioning to PADEP Revision 8, ESC's experienced team will assist you in understanding, planning and implementing a successful transition to Revision 8.

The SafePassage Program – Transitioning to PADEP Revision 8 includes:

- Development of an implementation plan for transitioning to Revision 8
- Assistance with the preparation and submittal of preliminary documentation to PADEP, including sample hourly data and quarterly reports
- Regulatory consultation on the appropriate interpretations of Revision 8 options
- Telephone support on using ESC|StackVision to meet the Revision 8 requirements, including guidance on when to report process code "08" indicating "process down"
- Configuration changes to ESC|StackVision
- Generation and assistance with the first submittal of quarterly reports
- The knowledge transfer required to continue reporting to PADEP using CEMDPS after the transition quarter

**The deadline is quickly approaching and ESC can help!**
