### The ESC Permit Compliance Review Program

Are you confident with your permit compliance? Do you understand how you are maintaining compliance within your permit limits? Do you understand the interpretations and assumptions you made in determining your permit compliance? If you answered no to any of these questions, ESC has the answer to your problem!

Over the years, permit compliance requirements have increased in complexity as well as quantity. As a result, many interpretations and assumptions need to be reevaluated to maintain compliance. Don't have the time or resources to do this in-house? Take advantage of ESC's expertise!

Because ESC realizes that you may not have the time to review your current guidelines and research new options, we have created the Permit Compliance Review Program. Under this program, ESC's knowledgeable Regulatory staff will review your CEMS permit compliance limits, evaluating the assumptions and interpretations while incorporating the latest regulatory options. Upon completion of this program, ESC will provide the recommendations and knowledge required to independently maintain your compliance with confidence.

### Permit Compliance Review Program

- All services will be provided remotely.
- Frequency of completing this program will depend on the lapsed time since the last review, and the number of new employees and turnover rate since the previous review.
- The customer is responsible for supplying current permits to ESC for review.
- This service provides recommendations and consultation. ESC is happy to assist you with the implementation of this program. If interested in implementation services, additional fees may apply.

**Contact your Senior Account Executive today for more information on the Permit Compliance Review Program!**
