## The ESC QA/QC Plan Update Program

If your QA/QC plan is not a living document and it has not been updated recently, you could be at risk! Is your plan truly a living document? Has it been updated since the transition to ECMPS and new DAS software? Have you replaced or added equipment and incorporated new maintenance procedures into your plan? Luckily, ESC has the solution to your problem.

With all of the recent regulatory changes that have taken place in the industry, including CAIR, RGGI, Mercury (Hg) and ECMPS, you can't afford to have an outdated QA/QC plan. But where and how are you supposed to find the time to maintain them when the issues are constantly evolving?

As the deadline for XML reporting is now here and with all of the future industry changes, ESC realizes that you don't have the time to continuously monitor the changing regulatory environment and adjust your QA/QC plan accordingly. The QA/QC Plan Update Program eliminates that hassle by taking your existing plan and updating it, ensuring compliance with current EPA regulations. ESC will work closely with you to update your step-by-step procedures. As part of the updating process, ESC will incorporate the ECMPS and ESC|StackVision steps into your current plan. At the end of the program, ESC will present you with an up-to-date QA/QC plan necessary to demonstrate compliance to air regulators.

### QA/QC Plan Update Program

- All services will be provided remotely and as a one-time update.
- The customer is responsible for supplying the existing QA/QC plan in Microsoft® Word-compatible format.
- The customer is responsible for providing manufacturers' manuals (if applicable).

In a constantly-evolving industry where real-time information is essential to success, having an up-to-date QA/QC plan is vital to your compliance. Since you don't have the time to scour the marketplace for changes, let ESC manage this burden with the QA/QC Plan Update Program.

## DAS-Only Portion for QA/QC

What if you only need to update DAS information for your QA/QC plan? ESC has that service for you! With the transition to XML, changes have resulted in facilities' DAS servers. The procedures that were once applicable to the DAS operations have changed, impacting the need to update QA/QC plans.

ESC Regulatory experts are ready to address your needs for updating the DAS recordkeeping and reporting procedures outlined in your QA/QC plans. At the end of the program, ESC will present you with a QA/QC plan as it pertains to the DAS procedures for the applicable monitoring methodology, enabling you to incorporate the information into your company's existing QA/QC plans.

- Update pertains to the DAS portion of the QA/QC plan only.
- ESC will provide electronic copies of the plan in the standard ESC format.
- All services will be performed remotely and are a one-time update.
- Customer is responsible for incorporating the QA/QC plan update for the DAS into their existing QA/QC plan.
