

CEMSProtect Partner Program

CEMSPROTECT
PARTNER PROGRAM

Like many in the energy industry, you face an ever-increasing list of challenges to keep your operations running efficiently and comply with evolving air emissions regulations. ESC Spectrum's **CEMSProtect Partner Program** provides the services you need to protect your equipment and stay in compliance. We work with you to ensure all required quarterly activities are completed correctly and on time, while providing your technicians with on-the-job-training, troubleshooting expertise and support.

Our solutions are customizable to the individual needs of your facility, and we recognize that these can change regularly. Your challenges can vary by quarter, and our professional staff is prepared to adjust each site visit to solve different issues.

We partner with you and bring customizable CEMS training and assistance to your doorstep.

CEMSProtect Partner Program

Challenges	CEMSProtect Partner Program Solutions
Over-extended technicians lack time to perform maintenance activities	<p>We partner with you to:</p> <ul style="list-style-type: none"> Conduct quarterly QA activities (Linearity, CGA and more) Perform preventative maintenance activities Complete Opacity Filter Audits Review Flow-to-Load checks
Staff turnover and senior technician retirements result in a loss of CEMS expertise	Experienced technicians provide industry-leading, hands-on training while performing your CEMS maintenance activities.
Lack of resources to evaluate maintenance plan effectiveness	We work with you to evaluate your maintenance plan, make suggestions for improvement, then assist with implementation.
Inability to engage in off-site training due to budget restrictions and/or COVID-19	We travel to your facility and follow all required protocols to help keep you safe.
Solving unusual CEMS issues	Our experienced staff has seen it all. We are highly-skilled in troubleshooting reoccurring and unusual problems.
No backup staff for unplanned events	We have staff ready to help you when you need it.
Lack of ad-hoc expertise for CEMS issues	Access to 24/7 phone support from qualified technicians.
Changing CEMS service needs	We dynamically adjust each visit according to your changing needs and tailor to your site and equipment.

To complement our services, ESC Spectrum has an extensive variety of parts for CEMS, ranging from the most common to the hardest to find, including analyzers, probes, pumps, PMTs, specialty gaskets, filters and more. We also operate a full depot-level lab with the ability to repair and refurbish most major CEMS analyzer and monitor brands.
